Ontario Community Outreach Program for Eating Disorders (OCOPED)

OCOPED provides training for community-based practitioners to better serve their patients with eating disorders, and for educators to learn up to date prevention strategies. OCOPED works collaboratively with a provincial network of specialized service providers. The training is available to those who offer no fee for service, including physicians covered by OHIP.

The information provided in this document is not intended as a treatment tool but rather as a description of the existing eating disorder services funded across Ontario by the Ontario Ministry of Health and Long Term Care.

Geographical Catchment Area
All of Ontario.
