

Dear referring practitioner,

- Please print and complete this page then fax back with the completed referral.
- Please review the following checklist to ensure that all information is available for more efficient triaging and shorter wait times for your patient.
- Please send this completed application only once results for all required investigations are available. Referrals with pending results will not be triaged until results are available.

Consult endocrinology when (please check box that applies to your patient):

Hirsutism in a female which primarily involves the face, chest, shoulders, upper back, abdomen, upper thighs, buttocks

Investigations Required:

- Free Testosterone
- DHEAS
- Androstenedione
- LH
- FSH
- Estradiol
- 17-OHP (during follicular phase or after 2 months of amenorrhea)

Triaging Urgency for Hirsutism Appointments:

- Elective

We strive to meet the triaging times (below), but please note that times may vary in particular for non-urgent or elective referrals.

Thank you

Categories for Urgency:

Emergent- contact staff endocrinologist on call (905) 521-5030
